

# Full-Stack Developer

Annecy, France | R&D | Unsolicited application

CIXI is an automotive start-up company. Our mission is to develop a new type of electric vehicle combining the benefits of a car and those of a bicycle, allowing people to be active during their daily trips and reduce their environmental footprint.

We are always open to meet talented **Full-Stack Developers**, who are willing to commit to our project. As a full-stack developer, you could be responsible for the development of our external communication sites as well as our production management tools and our ERP.

## Typical missions

- Improve CIXI's website
- Develop our custom intranet tools
- Develop our client App for our customers to use with their vehicles
- Manage CIXI's IT infrastructure and equipment

## Your profile

- Technical skills:
  - SQL databases management and querying
  - Web server management (Linux configurations, Docker)
  - Back-End web development
  - Front-End web development
  - App coding (Java, Android, ...)
- You have excellent problem solving skills and are willing to learn fast
- You can demonstrate autonomy while being a dynamic team player
- You have a good level in English

At CIXI we value **engagement, intellectual honesty, and kindness**. We are currently a team of 20+ people, and each of us is an important pillar for the creation of the Hyfit.

**Do you think you can bring new skills and your expertise to our project?**  
Send us your resume and a personalized cover letter at [jobs@cixi.life](mailto:jobs@cixi.life), we will get back to you soon!
