

Full-Stack Lead Developer

Annecy, France | R&D | Full-Time or Internship | ASAP

CIXI is an automotive start-up company. As a **Full-stack lead developer**, you'll be part of the IT and R&D team. You will be building with us the next generation of active vehicles along with unique experiences to bring people into a healthier lifestyle. You have the skills to create durable and efficient IT architectures, as well as delivering state-of-the-art applications.

By joining us as a **Full-stack lead developer**, you will be in charge of **developing our internal and public websites and databases**, for applications ranging from customer interfaces (web and App) to Enterprise Resource Planification and management (ERP).

Some of your responsibilities :

- Improve CIXI's website.
- Develop our custom intranet tools.
- Develop our client App for our customers to use with their vehicles.
- Manage CIXI's IT infrastructure and equipment.

Your profile :

- Your technical skills:
 - SQL databases management and querying.
 - Web server management (Linux configurations, Docker).
 - Back-End web development (Ruby on Rails).
 - Front-End web development (Vue.js).
 - App coding (Java, Android, ...).
- You have excellent problem solving skills and are willing to learn fast.
- You can demonstrate autonomy while being a dynamic team player.
- You have a good level in English and French

At CIXI we value **engagement, intellectual honesty, and kindness**. We are currently a team of 10+ people, and each of us is an important pillar for the creation of the Hyfit. There is a possibility to continue with us as a full-time employee after the internship.

Want to join our team?

Send us your resume and a personalized cover letter at jobs@cixi.life, we will get back to you soon!
